Search Anywhere

DocketCall Web, an extension of our flagship solution DocketCall, allows courthouse visitors to view and search real-time case information from a computer or mobile device before entering the courthouse. Our DocketCall solution integrates with the court's existing Case Management system, filtering and publishing the docket data to the DocketCall Web server.

DocketCall Web is available as an additional benefit included in our Premium System Support Agreement. This complementing service to DocketCall can be customized with the court's website branding for a cohesive viewing experience. The court's website will provide visitors with a link giving them access to the same DocketCall information displayed on courthouse docket monitors.

DocketCall Web enables users to step confidently into the courthouse, equipped with the knowledge of where they are headed, eliminating confusion and providing an improved visitor experience.

ABOUT INFAX · For 50 years, Infax has been helping patrons navigate public spaces. Our systems provide our clients with the capabilities to communicate vital information in real-time. With thousands of displays nationwide, our solutions have become an integral fixture in the judicial, healthcare, and transportation markets and remains committed to being the most reliable and effective solution for information distribution.

DocketCall Web informs patrons with up-to-date case information through the court's website.
